

2-WHEELER CAMERA

The Rapidise 2-Wheeler Camera is a compact, self-contained smart vision solution designed specifically for motorcycles and scooters, featuring built-in Wi-Fi connectivity for direct pairing with a mobile application. Engineered for rugged outdoor use, it delivers clear HD video capture, wide-angle visibility, and stable performance even under vibration and varying weather conditions. With app-based access for live view, recording control, and instant playback, the camera empowers riders with enhanced situational awareness, easy content management.

FEATURES

Durable & Weatherproof Build

Loop Recording

Wide-Angle Lens

Long Battery Life

Night Vision Performance

Technical Specification

Processor / SoC	Augentix HC1726
Image Sensor	2 MP, 1/2.9" low-illumination CMOS sensor
CPU Architecture	Dual-core ARM Cortex-A7
Processor Acceleration	Neon & FPU support
RAM	128GB
SD Card Storage	256 GB
Video Compression	H.265+ (compatible with H.265 / H.264), High Profile
Snapshot Support	JPEG snapshot
Recording	In-Product Recording on Micro SD Card
Live Streaming	Real-time Wi-Fi streaming
Supported Protocols	TCP/IP, HTTP, DHCP, DNS, DDNS, PPPoE, SMTP, NTP, HTTPS
Application Support	Android application compatible
Network Interface	Wi-Fi
Security Protocol	HTTPS Support
